**Brand Guidelines** 

Brand Guidelines contents

# **Purpose**

The Brand Guidelines book is intended to create a uniform look for all internal and external company branding and communications. Use this guide as a resource on how to appropriately represent Archway Community Services in all communications.

Brand Guidelines

# STANDARD LOGO

Use whenever possible as first option.

# SIMPLE LOGO

Use when tagline does not need to be or cannot be accompanied with the logo.

# **REVERSE WITH COLOUR**

Use when the standard logo doesn't work, but the colours are still legible on the background.

#### **FULL REVERSE**

Use when the standard logo doesn't work. For example, when the background is dark.

Brand Guidelines Logo spacing and usage

#### LOGO SPACING

For maximum legibility, the logo should have a minimum white space around it equal to one third of its height.

# LOGO USAGE

The logos should be used correctly at all times. Do not alter the logos in any circumstance. Use the correct colour system: RGB for web materials and CMYK or Spot Pantone inks for printed materials.

# **AVOID DOING THE FOLLOWING:**

Distort the aspect ratio
Add graphic elements
Change the brand colours
Rotate them
Position them too closely to other graphics
Overlap them on a busy background

Brand Guidelines COLOUR PALETTE

# **COLOUR PALETTE**

It is important to employ the correct CMYK, RGB or HEX values to ensure proper colour consistency. Be aware that there will be some differences in how colours are portrayed when used in different instances such as Pantones (PMS) vs. web applications (RGB) but use of the values provided will allow for the closest match.

Please limit secondary colours to black, greys and white only.

# PRIMARY ARCHWAY COMMUNITY SERVICES COLOURS

CMYK 41 0 36 0

RGB 151 210 181

HEX #97D2B5

PANTONE 353 C
